A WATER CONDITIONING AGENT

May cause damage to organs through prolonged or repeated exposure. Get medical advice/attention if you feel unwell. To avoid risks to human health and the environment, comply with the instructions for use.

Contains: DIETHYLENE GLYCOL CAS-No.: 111-46-6

DANGER

DIRECTIONS FOR USE

Volta-Ego is a water conditioning agent designed to sequester ions in hard water areas and buffer the pH of the spray solution to around pH 5 to prevent alkaline hydrolysis.

Volta-Ego can also be used to aid with drift reduction and as an anti-foaming agent.

RATES OF USE

Volta-Ego should be used at a rate of 0.25% dilution of the final spray volume:

for example:

Water Volume	Required Quantity of Volta-Ego
100litres/ha	250ml/ha
200litres/ha	500ml/ha

MIXING

Half fill the water tank with clean water and commence agitation. Add the recommended quantity of Volta-Ego. Then add the recommended quantity of pesticide and the remaining balance of water to the spray tank whilst maintaining agitation throughout.

**ALWAYS ADD VOLTA-EGO FIRST
AFTER WATER TO THE SPRAY TANK**

Conditions of supply

All goods supplied by us are of high grade and we believe them to be suitable but as we cannot exercise control over their storage, handling, mixing or use, or the weather conditions before, during and after application, which may affect the performance of the goods, all conditions and warranties, statutory or otherwise, as to the quality of fitness for any purpose of our goods are excluded, and no responsibility will be accepted by us or re-sellers for any failure in performance damage or injury whatsoever arising from their storage, handling, application or use. These conditions cannot be varied by our staff or agents whether or not they supervise or assist in the use of such goods.
